

EffectiveSoft Ltd.

EffectiveSoft confirms ISO 9001:2008 certification

Minsk, Belarus - April 2, 2009 - EffectiveSoft Company has proved its Quality Management System to be compliant to 9001:2008 world quality standards. The ISO 9001:2000 certification was achieved by the company last year, but it requires annual confirmation; so the compliance to world quality standards was confirmed by EffectiveSoft again. The audit will be performed every year to ensure maintenance and correspondence of company to strict requirements of standard.

The certification was held by third parties, and the representatives of National Certification Organization of the Republic of Belarus have verified if EffectiveSoft's Quality Management System meets the requirements of 9001:2008 standard. EffectiveSoft's policies, rules and regulations, service records and regulatory requirements were controlled and monitored by auditors and an inspector, and proved to be compliant to international ISO 9001:2008 standards.

Quality-related activities of EffectiveSoft, the ability to meet clients' need and the conformity of business processes to applicable statutory and regulatory requirements were major factors for EffectiveSoft's ISO 9001:2008 accreditation. Moreover, the accreditation of EffectiveSoft to ISO 9001:2008 quality standard was possible due to a high level of software services, provided by the company and its continual improvement.

About ISO:

ISO 9001 is known as international quality management standard, maintained by International Organization for Standardization in 1987 in Switzerland, it is administered by accreditation and certification bodies. Certification to an ISO 9001 standard demonstrates a high effectiveness of business processes, continual improvement of the quality system and customer satisfaction with provided services.
