EffectiveSoft Ltd. Released A New Version Of Intellexer Summarizer

Software developers released a new version of a program which helps to search the main concepts of a text

EffectiveSoft Ltd. an offshore software development company released a new version of Intellexer Summarizer.

Intellexer Summarizer is a desktop application which analyzes a text and extracts its key concepts, and a helpful tool for document management and data search.

The new version preserves the features of Intellexer Summarizer 2.5, such as concept tree, history and summary types. Some new features and enhancements have been introduced:

- Higher processing quality due to improved summarization algorithms
- Compatible with: Windows Vista, MS Word 2007, MS Outlook 2007 and Mozilla 3.0.x
- New look and feel, improved usability: tabs view for summary windows and large icons
- New file format support: Internet Shortcuts (*.url)

Intellexer Summarizer can be used daily for some routine work on your computer such as reading long emails, analyzing news, getting resume of electronic books and documents.

Intellexer Summarizer 2.6 is available at <http://summarizer.intellexer.com/>.

If your Intellexer Summarizer is of any earlier licensed 2.x versions, it can be easily updated to version 2.6.
